EDUCATION

KCC Institute of Technology and Management (AKTU) — New Delhi, India

Aug 2024 – May 2028

Bachelor of Technology, Computer Science and Engineering

BRMVB School — New Delhi, India

Apr 2022 – Mar 2024

Higher Secondary Education, Non-Medical Science (PCM + CS)

TECHNICAL SKILLS

Languages: Python, Java, C++, JavaScript, HTML/CSS, SQL

Frameworks: React, React Native (Expo), Node.js, Express.js, Flask, scikit-learn, MediaPipe, Pillow

Databases: MongoDB, MySQL

Tools: Git, GitHub, Docker, Google Colab, VS Code, Postman, EAS Build

Concepts: DSA, OOP, REST APIs, Machine Learning, Neural Networks, Web Automation

EXPERIENCE

Artificial Intelligence Intern — CodeSoft | Remote

Jul 2026 – Aug 2026

- Developed machine learning and data-driven solutions as part of a focused AI/ML internship program.
- Implemented core ML concepts in Python across multiple assigned projects, from data handling to model evaluation.
- Improved debugging and software development practices through hands-on, project-based learning.
- Delivered all assigned projects on schedule while adhering to industry best practices.

Artificial Intelligence Intern — Pinnacle Labs | Remote (Virtual)

Jun 2026 – Jul 2026

- Completed a 4-week virtual internship focused on artificial intelligence and machine learning.
- Built AI-based projects involving data preprocessing, model development, and applied problem-solving.
- Applied Python and ML concepts to build practical AI solutions.
- Strengthened analytical thinking through hands-on experience with AI tools and workflows.

Full Stack Web Development Intern — Syslaan IT Solutions | Remote

May 2026 – Jun 2026

- Built responsive full-stack web applications using HTML, CSS, JavaScript, React, Node.js, and MongoDB.
- Designed and integrated REST APIs connecting backend services to frontend applications.
- Optimized application performance and resolved bugs to improve user experience.
- Collaborated on real-world development tasks following software engineering best practices.

PROJECTS

ISL Bridge | React Native, Expo, Flask, MediaPipe, Tensor Flow/Keras

2024 – Present

- Built a real-time Indian Sign Language (ISL) translator mobile app achieving 96–98% classification accuracy using a custom Dense Neural Network trained on 21-point MediaPipe hand landmark data.
- Designed a full-stack architecture with a React Native/Expo frontend and a Flask REST API backend (/health, /signs, /predict); handled multi-screen navigation (Splash, Onboarding, Permissions, Mode A/B).
- Engineered ML pipeline in Google Colab: data extraction, landmark normalization, model training, and weight serialization (weights.npz + label_map.json) to resolve cross-version Keras compatibility issues.

- Maintained two production GitHub repos (frontend + ML backend) with structured commit history; submitted to collegiate hackathon under Open Innovation track.

JARVIS — Local AI Assistant | Python, Ollama (Llama 3.2), MediaPipe, faster-whisper, edge-tts

2024 – Present

- Built a fully offline AI assistant for Windows using Ollama (Llama3.2) for LLM inference, faster-whisper for speech recognition, and edge-tts for voice output — zero cloud dependency.
- Integrated MediaPipe hand tracking for gesture-based mode switching with multi-hand support, CRUD gesture management, and a custom gesture trainer module.
- Implemented a pyautogui-based computer control pipeline enabling hands-free system interaction.

VoiceLegal | React, Node.js, Express, MongoDB Atlas, Web Speech API, GPT-4o

2024

- Architected an AI-powered Indian legal awareness assistant supporting Hindi and English voice input via Web Speech API, targeting underserved populations with limited legal literacy.
- Built full-stack system with React/Tailwind frontend, Node/Express backend, MongoDB Atlas, and GitHub Models (GPT-4o) for LLM inference; scoped Google Maps API for nearest legal aid centres.

E-Commerce Platform | MongoDB, Express.js, React, Node.js (MERN)

- Full-stack e-commerce app with user authentication, product catalog, cart management, and order tracking.

ACHIEVEMENTS

- LeetCode: Solved 100+ problems spanning arrays, trees, graphs, DP, and sliding window; consistent DSA practice for technical interviews.
- Hackathons: Competed under Team Alpha; participated in HackIndia 2026 (India's Biggest Web3 & AI Hackathon by C# Corner); consistently ranked in top 20% across multiple collegiate-level hackathons.
- GPA: Maintaining 8.5/10 in B.Tech CSE at AKTU while building production-level projects and running a live business.

CERTIFICATIONS

- be10x AI Tools & ChatGPT Workshop – Completion Certificate, be10x (Apr 2026)
- IEEE EDS MAIT – Certificate of Participation, Generative AI Webinar, Maharaja Agrasen Institute of Technology
- HackIndia 2026 – Certificate of Participation, India's Biggest Web3 & AI Hackathon, C# Corner (Team Alpha)
- HackerRank Voyager Blitz – Certificate of Participation, in Voyager Blitz HackIndia Spark-4.
